

KNABSTRUPPERFORENINGEN FOR DANMARK's BREEDING PROGRAMS

APPENDIX 1: Foreign associations approved for outcrossing

Knabstrupperforeningen for Danmark allows in the respective breeding programs outcrossing with horses/ponies from a number of Danish breeding associations. These associations represent the following breeds:

Frederiksborg
Oldenburg
Trakehner
Arab
Danish Warmblood
Holsteiner
Thoroughbred.
Lusitano
Andalusian.
New Forest
Welsh (not sec. D – Welsh Cob)
Connemara
Danish Sports Pony
Dartmoor.
Shetland Pony
Miniature Horse.

Outside Denmark's borders, the Breeding Management can expand the outcross list with similar associations, and that is what the following list represents. The list is divided geographically, and a number of these foreign associations span several breeds. Note that some of these breeding associations also include quite a few breeds that are NOT allowed to cross into KNN!

It is recommended that you always consult with the Breeding Management first to make sure that the horse in question, which you intend to use for outcrossing, can be approved. The individual horse must satisfy KNN's requirements for pedigree, assessment, performance test, colour and other rules. In the end, it will always be up to the Breeding Management's discretion whether a cross can be allowed.

The list is expanded and edited as the need arises.
